Oracle Cloud APEX – PL/SQL Developer
<https://www.linkedin.com/in/hernanbriceno/>

PROFESSIONAL SUMMARY

Senior Oracle APEX and PL/SQL Application Developer with 15+ years of experience designing, developing, and supporting enterprise applications, database solutions, and supply chain systems. Proven expertise in Oracle APEX, PL/SQL, Warehouse Management Systems (WMS), Distribution Operations, Systems Integration, and full Software Development Lifecycle (SDLC) delivery.

Expert in **SQL, PL/SQL**, performance tuning, and complex data-driven solutions, including **data migration, conversion, external tables, indexing, joins, and shell scripting**. Proven ability to **gather requirements, lead solution design efforts, debug complex applications**, and deliver scalable, secure, and high-performing systems in fast-paced environments.

Hands-on experience across **Oracle Cloud Infrastructure (OCI)**, including Autonomous Databases, Data Integration, MySQL HeatWave, Oracle AI services, multi-cloud interconnect (Azure/Google), IAM, VCN networking, security, monitoring, logging, and automation. Strong background in **stored procedures, packages, triggers, API integrations, Fast Formula**, and database administration fundamentals, including schema design, permissions, indexing strategies, and database best practices.

Skilled in building dynamic and interactive **APEX reports**, optimizing PL/SQL using SQL Trace, Explain Plan, Hints, Bulk Collect/Binds, and ensuring end-to-end performance excellence. Adept at ETL using SQL*Loader and SSIS, with deep expertise in query optimization, code tuning, and enterprise data integrity. Recognized for delivering high-quality solutions, leading stakeholder sessions, and translating complex requirements into robust APEX applications.

CORE SKILLS

Oracle APEX & Application Development: Oracle APEX, SQL, PL/SQL, SQL*Plus, SQL*Loader, Oracle Databases (19c, 12c, 11g, 10g, 9i), Interactive Reports, Interactive Grids, Dashboards, Forms, Dynamic Actions, Authentication, Authorization, JavaScript Integration, REST APIs, JSON, Web Services, Oracle Application Development Framework (ADF), Oracle Discoverer.

Oracle Database Development & Performance Tuning: Packages, Stored Procedures, Functions, Triggers, Materialized Views, Tables, Indexes, Views, Synonyms, Database Users, Permissions & Privileges, Data Types, Performance Tuning, Query Optimization, Explain Plan, SQL Trace, Hints, Bulk Collect, Bulk Bind, Data Modeling, ETL Processing, Database Design, Data Migration, Data Conversion, External Tables.

DevOps, Version Control & CI/CD: Git, Bitbucket, Azure DevOps, Jenkins, Jira Integration, SourceTree, Git CLI, YAML Pipelines, CI/CD Pipelines, Automated Deployments, Release Management, Source Control Governance, Branching Strategies, Multi-Environment Deployments (DEV, SIT, QA, UAT, PROD), Workflow Governance.

CORE SKILLS (Cont.)

Supply Chain, Warehouse & ERP Systems: Warehouse Management Systems (WMS), Transportation Management Systems (TMS), Distribution Management Systems (DMS), Supply Chain Operations, Distribution Operations, Inventory Management, Logistics, Shipping & Receiving, Cross-Docking, Financial Transactions, EDI Transactions (850, 855, 856, 810), Oracle Fusion, Oracle EBS, TECSYS Suite, Infor Visual, Infor Cloud Services, SmartStream, B2B Sterling.

Cloud Technologies: Oracle Cloud Infrastructure (OCI), Autonomous Database, Data Integration, MySQL HeatWave, Oracle AI Services, IAM, VCN Networking, Security, Monitoring, Logging, Cloud Architecture, Cloud Database Services.

Programming & Front-End Technologies: JavaScript, React, Node.js, HTML, CSS, XML, JSON, Python, Java Foundations, Front-End Development, Browser-Based Enterprise Applications.

Systems Integration & APIs: REST APIs, Web Services, JSON Integration, XML Interfaces, Oracle APIs, Fast Formulas, Systems Integration, Data Integration, Application Integration, Third-Party Vendor Integration, Enterprise Application Interfaces.

Reporting, Analytics & Business Intelligence: Oracle APEX Reporting, OTBI, BI Publisher (BIP), IBM Cognos Analytics, Power BI, DAX, Power Query, Klipfolio, Dashboard Development, Data Visualization, Executive Reporting, Operational Reporting.

Development Tools: SQL Developer, TOAD, SQL Navigator, Visual Studio Code, Spotlight, Jira, SharePoint, Excel.

Methodologies, Testing & Leadership: Software Development Lifecycle (SDLC), Requirements Gathering, Business Analysis, Solution Design, Agile, Scrum, Kanban, Waterfall, User Acceptance Testing (UAT), Unit Testing, Assembly Testing, Production Support, Root Cause Analysis, Technical Documentation, BRD, FTD, Knowledge Base Development, Stakeholder Management, Cross-Functional Collaboration, Training & Knowledge Transfer.

Operating Systems: Unix/Linux, Windows Server.

SECURITY & FEDERAL ELIGIBILITY

Eligible for Security Clearance Levels 1 – 5.
(U.S. public-sector experience; no active clearance yet).

Willing to travel up to 15% for distribution center implementations, training, testing, and production support activities.

PROFESSIONAL EXPERIENCE

Jira Git Bitbucket Admin | Capital Minds Inc – Part-time – Remote | Apr 2026 – Present

- Core Skills: Bitbucket + Jira Integration + SourceTree + Git CLI, YAML-based pipelines, multi-environment setup (Dev / SIT / QA / Prod), Permissions + workflow governance
- Designed and implemented source control architecture in Bitbucket, enabling structured workflows across Dev, SIT, QA, and Prod environments
- Developed and configured YAML-based CI/CD pipelines to automate code integration and execution, supporting consistent promotion across environments
- Integrated Jira with Bitbucket version control to enable traceable, ticket-driven development and release processes
- Established branching strategies, access controls, and workflow standards to support secure, scalable, and efficient development lifecycle management

Sr. Oracle APEX Developer Supply Chain | Apex Systems – Boise, ID | Jan 2024–May 2025

- Environment: Oracle APEX, PL/SQL, Git, Oracle Database, Azure DevOps, WMS, EDI, Supply Chain Operations.
- Developed and supported Oracle APEX applications and PL/SQL backend solutions supporting enterprise Warehouse Management System (WMS) operations.
- Developed and supported REST API integrations and data interfaces between Oracle applications, WMS platforms, and enterprise systems.
- Gathered business requirements and translated operational needs into scalable Oracle APEX dashboards, reports, and workflow enhancements.
- Analyzed warehouse, inventory, logistics, and financial transaction data to support new WMS implementations.
- Developed SQL and PL/SQL components including packages, procedures, functions, and performance-tuned queries.
- Collaborated with business users, warehouse operations teams, and technical stakeholders through the full SDLC including requirements, design, development, testing, deployment, and production support. Utilized Azure DevOps for source control, sprint planning, release management, and application lifecycle management.

Sr. Oracle Application Developer | Talcott Resolution – Windsor, CT | Jun 2020–May 2023

- In-House built-in ERP system using Oracle Databases.
- Fixed 17 tickets from prod support and worked in 4 enterprise projects (6 months term).
- Production support for Oracle APEX existing visualizations, views, and reports.
- Designed and maintained database schemas to support insurance applications.
- Worked with materialized views. Worked with stored procedures using data type, table type.
- Oracle cloud backend developer to fix tickets from production support.
- Worked with PL/SQL, ETL process development, data modeling. Version control, Workload, Jira. Extracted data from schemas.
- Supported application releases across DEV, SIT, QA, and Production environments utilizing Jenkins, workload automation, change management, and deployment processes.
- Created BRD, FTD, UT, AT, technical and functional documentation, knowledge base.

PROFESSIONAL EXPERIENCE (Cont.)

Sr. APEX ERP Developer – SCM | USESI – Middletown, CT | Aug 2019–Nov 2019

- Led ERP-to-WMS integration initiatives supporting distribution center operations and warehouse logistics processes.
- Led financial integration of ERP with Oracle TECSYS WMS and SCM modules.
- Created the new template for reports and visualizations using Oracle APEX.
- Executed data migration from ERP to Oracle WMS (mapping, transform, upload of critical datasets) Designed and implemented XML-based interfaces to extract, map, and prepare data for system integration. Developed and optimized SQL queries, stored procedures, and database scripts.
- Analyzed and documented ERP business rules to support WMS TECSYS implementation. Defined and implemented business rules for EDI transactions.

Sr. ERP Developer / EDI Analyst | Shelterlogic | Watertown, CT | Mar 2019 – Jul 2019

- Provided daily support, maintenance and development for Supply Chain Operations, ERP EDI transactions and integration with Gentrans Server. Monitored interface between ERP and EDI server using SaberLogic.
- Daily support for existing reports in Oracle APEX. Development of new reports and visualizations. Developed PL/SQL routines to extract data from another database and load it into the Oracle database. Created queries in SQL to extract/validate data, and fix errors related with inbound/outbound transactions.

ERP SA / APEX Developer | Walter Surface Tech – Windsor, CT | Dec 2016–Mar 2019

- Supported warehouse and transportation operations across multiple distribution facilities.
- Collaborated with warehouse users to implement process improvements in WMS, DMS and TMS platforms.
- Developed Oracle APEX dashboards providing operational visibility into inventory, shipping, receiving, and logistics activities. Created dashboards and visualizations in Oracle APEX.
- Supported distribution workflows including receiving, cross-docking, inventory movement, picking, packing, and shipment processing.
- Responsible to provide financial day to day prod support for all the ERP modules, and EDI.
- Worked in the PO process from the beginning to end, including picking, packing.
- Worked in the cross-docking process receiving items and setup for location in warehouse.
- Worked in the ERP process for in shipping (parcel, pallets) using USPS, UPS, FEDEX, LTL.
- Created documentation for knowledge base, BRD, FTD, unit test, assembly test.

PROFESSIONAL EXPERIENCE (Cont.)

Sr. Oracle/Cognos Developer | Fusionworks | Puerto Rico | Oct 2014–May 2016

- Implemented Oracle EBS HCM in University of Puerto Rico 11,000 employees, 13 locations.
- Created views in Oracle Apex to support Oracle Forms.
- Worked setup/configuration of financial transactions in Human Capital Management.
- Worked concurrent programs, configuration using iSuite, flexfields.
- Developed setup for API's, Fast Formulas, upload new data using database backend code.
- Worked interfaces for Oracle Financials (AP, AR, GL)

Sr. Oracle / Cognos Systems Analyst | MMM Holdings | Puerto Rico | Oct 2012–Jul 2014

- Worked in Oracle, APEX, SQL Server, and Cognos production support for enrollments and claims. Implemented changes using waterfall methodology and creating BRD, FTD, Solution Design docs. Liaison between Business Operations Team and Developers.
- Worked with CRM to process tickets related with Oracle, SQL Server, Cognos, APEX.

Sr. Programmer Analyst | GFR Media | Puerto Rico | Sep 2006–Oct 2012

- Indirect Business Analyst role as liaison between Finance and Accounting departments but:
- Implemented Financial reports using Cognos Tools. Provided daily support in Cognos for all the group of companies five in total. Extracted data from Financial SmartStream CRM to create data marts. Created cubes using Cognos Transformer and Power Play. Provided maintenance in Cognos Connection, for administration and security.

Sr. Cognos Developer / Admin | Smart Solutions – Boca Raton, FL | Jan 2005–Aug 2006

- Implemented BI data mart in CIBC member First Caribbean Bank in Barbados, using Cognos Framework Manager, database layer and business layer. Created reports in Cognos BI Tools, for Risk Events Department, Actual Loss, DHL Reputational Damage WIRE TRANSFER, Sundry Losses and Statistics. Created business and technical documentation. Implemented test cases and validated with the SME the results. Defined security in Cognos Connection.

Sr. Oracle/Cognos Developer | Technology Partners | Puerto Rico | Jan 2000–Dec 2004

- Implemented Auto Loans ERP modules in different companies: Reliable Financial (Wells Fargo), Bank Trust, Long Term Project. Extracted data using ETL tools (SSIS, SQL*Loader).
- Implemented Oracle Financials in government agencies and private sector.
- Served as Business Analyst for the most of the implementation in Consulting Services role.
- Cognos developer and consultant, implemented data marts using Cognos tools v7, v8, v10.

CERTIFICATIONS & EDUCATION

Certified Scrum Master

Oracle Cloud Infrastructure, APEX Associate, Data Platform

Oracle Cloud APEX Professional (In Process)
