- **Cloud & Infrastructure:** Oracle Cloud Infrastructure (OCI), Microsoft Azure, Data Integration, Cloud Data Warehouses (Snowflake exposure).
- **Domain & Industry Experience:** Manufacturing Operations, Supply Chain & Logistics, Warehouse Management, Insurance, Finance & ERP Analytics.

PROFESSIONAL EXPERIENCE

Atlassian Administrator – CI/CD & DevOps Support

Apr 2026 – Present

Capital Minds Inc – Part-time – Remote

- Core Skills: Bitbucket + Jira Integration + Git CLI, YAML-based pipelines, multi-environment setup (Dev / QA / Prod), Permissions + workflow governance.
- Developed and configured YAML-based CI/CD pipelines to automate code integration and execution, supporting consistent promotion across environments
- Integrated Jira with Bitbucket version control.
- Building end-to-end Oracle Apex Cloud Applications.

Sr. WMS & ERP Business Analyst

Mar 2024 – Apr 2025

Apex Systems – St Luke's Health System Account – Boise, ID

- Led Oracle Cloud / Fusion WMS and Financials implementations, aligning supply chain, warehouse, and finance operations with standardized enterprise objectives.
- Partnered with manufacturing and operational stakeholders to define system requirements, validate business processes, and deliver BI dashboards that improved operational and financial visibility.
- Oversaw data integration, mapping, and governance for ERP, WMS, and EDI systems, ensuring accuracy and process standardization across inbound/outbound workflows.

Sr. Senior Business Analyst & Oracle Application Developer

Jun 2020 – May 2023

Talcott Resolution – Windsor, CT

- Bridged business and technical teams to deliver Oracle ERP and analytics solutions, focusing heavily on enterprise reporting, KPI tracking, and system optimization.
- Conducted operational data analysis and business process modeling to ensure ERP system accuracy and support executive decision-making.
- Provided strategic functional oversight for ERP initiatives, including scenario analysis, production support, and end-user knowledge management.

Systems Business Analyst – Supply Chain

Aug 2019 – Nov 2019

USESI US Electrical Services – Middletown, CT

- Led ERP–WMS business process integration between Epicor Eclipse and Oracle TECSYS WMS, aligning cross-functional supply chain workflows.
- Conducted full-cycle business data migration, including mapping, transformation, and validation of master and transactional data across enterprise platforms.
- Analyzed and documented supply chain workflows, creating data models and operational mapping specifications to identify and resolve process gaps.
- Partnered with stakeholders to gather business requirements, design analytics dashboards, and execute rigorous functional testing for reporting solutions.

PROFESSIONAL EXPERIENCE (Cont.)

Senior EDI Business Analyst Manufacturing

Mar 2019 – Jul 2019

ShelterLogic Group – Watertown, CT

- Supported core manufacturing ERP (Epicor Visual) operations across procurement, finance, shipping, and production teams to ensure process alignment.
- Managed business requirements and lifecycle execution for electronic supply chain transactions, optimizing data flows with external trading partners.
- Identified operational friction points and resolved process integration errors across enterprise e-commerce and logistics networks.
- Designed advanced functional data validation and reconciliation scripts using SQL and PL/SQL to ensure absolute data integrity.
- Collaborated with e-commerce, manufacturing, and supply chain teams to analyze operational KPIs and optimize business transaction performance.

Sr. ERP Systems Business Analyst

Dec 2016 – Mar 2019

Walter Surface Technologies – Windsor, CT

- Functioned as lead business analyst for manufacturing, finance, supply chain, and distribution ERP operations.
- Optimized manufacturing procure-to-pay, order-to-cash, and transportation workflows while defining KPIs and operational dashboards.
- Managed EDI and ERP process governance, documentation, and operational standards to ensure audit readiness and sustainable organizational performance.

Sr. Oracle / Cognos Business Analyst

Dec 2014 – Jun 2016

Fusionworks – Puerto Rico

- Led large-scale Oracle ERP (EBS HCM & Financials) process transformation for 11,000+ employees across 13 enterprise campuses, driving system standardization and compliance.
- Analyzed operational workflows and mapped complex business processes, creating comprehensive requirements documentation (BRD/FRD), data maps, and workflow diagrams.
- Configured core Oracle ERP system capabilities (Flexfields and automated uploads) and established functional interfaces across AP, AR, and GL modules to optimize financial workflows.
- Championed organizational readiness and end-user support, delivering Power BI/Oracle reporting solutions and resolving operational bottlenecks to drive seamless system adoption.

PROFESSIONAL EXPERIENCE (Cont.)

Senior Oracle Business Systems Analyst

Nov 2012 – Nov 2014

MMM Holdings – Puerto Rico

- Led the end-to-end SDLC process for enterprise reporting initiatives, authoring Business Requirement Documents (BRDs), functional specifications, and executing rigorous testing to align systems with operational needs.
- Analyzed and optimized core business workflows for healthcare claims and enrollment systems, translating complex data into actionable operational and financial insights.
- Partnered with cross-functional business and IT teams to deliver self-service BI analytics, driving standardized data governance and improving leadership decision-making.
- Championed system adoption and production support across enterprise Oracle and SQL Server environments, drastically reducing operational bottlenecks and ticket backlogs.

Sr. Cognos Financial Business Intelligence Lead

Sep 2006 – Oct 2012

GFR Media – Puerto Rico

- Partnered with Finance, Budget, and accounting stakeholders to analyze business processes, gather requirements, and develop reporting solutions supporting strategic decision-making.
- Identified reporting and process improvement opportunities, helping standardize financial reporting, budgeting, and performance management practices.
- Led user acceptance testing, training, and change adoption activities for enterprise reporting and planning initiatives.
- Implemented Prophix Financial Planning & Analytics to support budgeting, forecasting, and financial governance processes.

Sr. Cognos Administrator / Developer

Jan 2005 – Aug 2006

Smart Solutions – Boca Raton, FL

- Worked with banking business units and process owners to document requirements, analyze operational processes, and define reporting needs.
- Identified data and process gaps supporting audit, risk management, and financial performance initiatives.
- Facilitated stakeholder reviews, testing, and user acceptance activities to ensure alignment with business requirements.
- Supported process documentation, end-user training, and adoption of standardized reporting solutions.

PROFESSIONAL EXPERIENCE *(Cont.)*

Sr. Cognos / Oracle Developer

Jan 2000 – Aug 2004

Technology Partners – Puerto Rico

- Conducted business process analysis and requirements gathering sessions with government, financial, and educational organizations.
- Collaborated with stakeholders to identify process improvement opportunities and deliver reporting and Oracle-based business solutions.
- Supported testing, validation, and user acceptance activities to ensure successful solution implementation.
- Delivered user training, process documentation, and knowledge transfer to promote adoption and operational effectiveness.
